<b>Lesson-25:</b> Multiplication Made Easy! .....	68
<b>Lesson-26:</b> Doubles .....	72
<b>Lesson-27:</b> Vertical Method of Multiplication .....	75
<b>Lesson-28:</b> Topics in Multiplication .....	77
<b>Lesson-29:</b> Introduction to Money .....	79

<b>Lesson-30:</b> Adding Money . . . . .	82
<b>Lesson-31:</b> Subtracting Money . . . . .	85
<b>Lesson-32:</b> Money - Advanced . . . . .	87

## **MEASUREMENT**

<b>Lesson-1:</b> Estimating Lengths in Centimetres . . . . .	90
<b>Lesson-2:</b> Measuring in Centimetres . . . . .	92
<b>Lesson-3:</b> Measuring Objects with a Ruler . . . . .	95
<b>Lesson-4:</b> Estimating in Metres - Advanced . . . . .	98
<b>Lesson-5:</b> Kilometres . . . . .	100
<b>Lesson-6:</b> Kilometres - Word Problems. . . . .	102
<b>Lesson-7:</b> Appropriate use of Units of Measurements. . . . .	103
<b>Lesson-8:</b> Ordering Units. . . . .	105
<b>Lesson-9:</b> Perimeter . . . . .	107
<b>Lesson-10:</b> Perimeter - Advanced . . . . .	110
<b>Lesson-11:</b> Measuring Mass . . . . .	114
<b>Lesson-12:</b> Temperature . . . . .	117

## **GEOMETRY**

<b>Lesson-1:</b> Sides and Vertices. . . . .	120
<b>Lesson-2:</b> Introduction to Angles . . . . .	123
<b>Lesson-3:</b> Equilateral Shapes. . . . .	126
<b>Lesson-4:</b> Introduction to Symmetry . . . . .	129
<b>Lesson-5:</b> Symmetric Shapes . . . . .	131

## **STATISTICS**

<b>Lesson-1:</b> Introduction to Bar Graphs. . . . .	134
<b>Lesson-2:</b> Bar Graphs . . . . .	136
<b>Tear-able Activities.</b> . . . .	139

# Lesson- I

## Introduction to Place Value

**Note:** Have you ever thought about how important the place of a digit is in a number?

For example, in the number 415, the digit 5 is placed last. The position of the digit 5 in this number tells us something important. Let us see what it tells us.

Each digit in a number has a value which is determined by its position or place in the number. If the place of a digit in a number changes, so does its value.

**Place Value** is the value of a digit in a number which is determined by its position.

For example, 568 is a 3 digit number. Let us see how the position of each digit decides its value.

- The digit 5 stands for 500 - the value of the digit 5 is 500.
- The digit 6 stands for 60 - the value of the digit 6 is 60.
- The digit 8 stands for 8 - the value of the digit 8 is 8.

The number 568 can also be written in a place value chart as shown below:

568		
Hundreds	Tens	Ones
5	6	8

What would happen if I put 5 in place of 8 and 8 in place of 5? Would the number stay the same?

The number would change to 865.

- The digit 8 stands for 800 - the value of the digit 8 is 800.
- The digit 6 stands for 60 - the value of the digit 6 is 60.
- The digit 5 stands for 5 - the value of the digit 5 is 5.

The number 865 can also be written in a place value chart as shown below:

865		
Hundreds	Tens	Ones
8	6	5

When we changed the place of the digits in the number, the value changed. 568 is a smaller number compared to 865.

**1. Teacher Note:** Students will be able to identify place value in 2 and 3 digit numbers.

## Lesson- I

### Introduction to Place Value

1. Fill in the boxes with the place value of the underlined digit. The first one has been done for you.

ones

2. Write the place value of 8 in the numbers given below. Write 'H' for hundreds, 'T' for tens and 'O' for ones. The first one has been done for you.

## Lesson- I

### Introduction to Place Value

3. Write how many hundreds, tens and ones are in each number by filling in the place value chart.

a)

81		
Hundreds	Tens	One

b)

259		
Hundreds	Tens	One

c)

13		
Hundreds	Tens	One

d)

892		
Hundreds	Tens	One

e)

309		
Hundreds	Tens	One

f)

106		
Hundreds	Tens	One

g)

983		
Hundreds	Tens	One

h)

7		
Hundreds	Tens	One

i)

406		
Hundreds	Tens	One

j)

999		
Hundreds	Tens	One

## Lesson-2

### Place Value

2.1-BO-Quiz9

**Note:** Let us recall what we learnt in the previous lesson. The place value and value of each digit in the number 593 is shown below.

In the number 593, the digit 5 stands for 500, 9 stands for 90 and 3 stands for 3.

1. Fill in the blanks. The first one has been done for you.

- a) In the number 923, the value of the digit 2 is 20.
- b) In the number 133, the value of the digit 1 is \_\_\_\_\_.
- c) In the number \_\_\_\_ 09, the digit 6 stands for 600.
- d) In the number 945, the value of the digit 4 is \_\_\_\_\_.
- e) In the number 105, the digit \_\_\_\_\_ stands for 100.
- f) In the number 10\_\_\_\_, the digit 4 stands for 4

2. Write the value of each digit in the blanks given below:

**2. Teacher Note:** Students will learn the difference between the value and the place value of digits in 2 and 3 digit numbers.

## Lesson-2

### Place Value

3. Match the following numbers to the correct value of 8 in each number. The first one has been done for you.

a)

b)

c)

d)

e)

## Lesson-2

### Place Value

4.

In the number 17,  
the place value of  
7 is...

5.

In the number 89,  
the digit 8 stands  
for...

6.

In the number  
378, the value of  
3 is ...

7. In each of the statements given below, what does the underlined digit stand for?

a) There are 294 steps on the north side of the Leaning Tower of Pisa.

b) Agatha Christie loved writing stories, and wrote 66 detective novels during her career.

c) Camels have 3 eyelids to protect their eyes from the sand blowing in the desert.

d) During the last 16 years of Mughal Emperor Jehangir's reign, his wife Noor Jehan ruled the empire.
